

Important: Ordering NLIS devices in Queensland from 1st Oct 2019

Please be advised that NLIS device orders/request to DPI Authority forms cannot be processed unless you (the producer) has a current biosecurity entity registration. From 1 October 2019 requests for NLIS devices will be denied unless registration is current. Please ensure you have a current biosecurity entity registration before submitting an order.

- Biosecurity entity registration is separate to the industry system of LPA. Detailed information about who must be registered is available at [QLD GOV WEBSITE](#)
- **Biosecurity Queensland have emailed all registered entities with expired registrations providing instructions on how to renew registration.** If you as a producer have an online account, you can renew your registration on the Biosecurity Entity Registration Portal. If you don't have an online account, to get access call the DAF Customer Service Centre on **13 25 23**. Assistance is also available at [Regional Offices](#)
- For the Queensland Land owner request for access or removal to industry systems (NLIS, LPA NVD) Form [CLICK HERE](#) This is a form to be completed and uploaded with your order when you are not the land owner where the animals are kept and you:
 - require access to industry systems (NLIS, LPA NVD), or
 - no longer require access to industry systems (NLIS, LPA NVD)

For Regional DAF offices please refer to the [DAF QLD WEBSITE](#)

- Once you have access to your online account you can generate your own NLIS device order authority form online and supply to [4Tags](#) with your order for approved NLIS devices.
- As producers with an online account have already verified their details, the NLIS order form accessed using your online account is pre-authorised. This means you no longer need to seek separate authorisation from a biosecurity officer before submitting your order to [4Tags](#).

This speeds up the NLIS tag ordering process for Qld producers.

Up to date biosecurity entity registration information is a critical part of Queensland's robust biosecurity system. Biosecurity entity registration allows DAF to better prepare for biosecurity emergencies, respond to biosecurity risks and trace the origin and spread of a pest or disease. This makes it easier to, for example, contact cattle producers if there's a biosecurity event that could affect their industry.

For more detailed information about biosecurity entity registration or renewal visit qld.gov.au/BioSecReg or call the Department of Agriculture and Fisheries Customer Service Centre on 13 25 23
