WHAT IS THE ALLFLEX CLUB?

The Allflex Club has been developed as a platform to offer special promotions and communications to eligible producers. The 10% BONUS Tag Offer is the first of our special promotions and is specifically designed for the sheep & goat eID segment in 2025.

WHAT DOES 10% BONUS TAGS LOOK LIKE

- 10% BONUS Tags are applied to the total for each eligible tag kind (print program) by Allflex after the order is received - retailers only need to input the tags to be invoiced to the farmer.

All BONUS Tags will be rounded up to nearest 20 tags.

- E.g. If a producer needs 1000 tags, they must order 1000 and receive a bonus 100
- E.g. If a producer needs 1500 tags, they can order 1380 and receive a bonus 140 (where 138 bonus tags are rounded up to 140)

To assist in your calculations: Divide total tag requirement by 1.1, round up to nearest 20, and invoice that amount - Allflex will do the rest.

- Multiple RapID Evo eID tag print programs can be ordered on one purchase order; the total quantity ordered will be eligible for BONUS tags if quantity reaches 1000 tags or greater.
- E.g. 500 RapID Evo tags (normal) & 500 RapID Evo tags (vaccinated) totals 1000 tags and is eligible for BONUS Tags (if other conditions are met). The BONUS Tags will be applied to each print program (e.g. 50 normal, 50 vaccinated - these will be rounded up to 60 per program).

Where tags are not divisible by 20 tags, input numbers must be rounded up to nearest 20 tags.
